Java Backend Developer — Spring Boot | REST APIs | PostgreSQL | Angular

Summary

Java Backend Developer with 1+ year of production experience building Spring Boot REST APIs for a banking case-management platform (LTIMindTree, client: ABSA Bank) spanning 8 countries. Works directly on business logic, SLA-based batch processing, and PostgreSQL operations in a live enterprise environment, including an API redesign that cut response time by ˜96%. Also builds full-stack applications with Angular and TypeScript.

Technical Skills

Languages: Java, SQL, JavaScript, TypeScript, C++
Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, REST APIs, Microservices, Apache Kafka
Frontend: Angular, TypeScript, JavaScript
Databases: PostgreSQL, MySQL
Testing & Tools: JUnit, Mockito, Git, Docker, Kubernetes, Postman, Jira
Core Concepts: Object-Oriented Programming, Exception Handling, Multithreading, Design Patterns, Data Structures & Algorithms, Agile Development

Work Experience

Software Engineer, LTIMindTree (LTM) Jun 2025 – Present
Spring boot | Client: ABSA Bank

- Engineered REST APIs in Java/Spring Boot for a multi-country banking case management platform spanning 8 countries, supporting automated email-triggered case creation and full CRUD operations.
- Automated SLA-based case escalation through scheduled Spring Boot batch-processing jobs, triggering reminder notifications and re-routing cases when managers were unavailable.
- Delivered 10–15 production change requests (CRs), implementing business logic enhancements and feature updates directly in a live banking production environment.
- Redesigned case-listing API pagination, limiting result sets to 20 records per page instead of returning all 30,000+ cases in one call, cutting response time from 2 min 45 sec to 6 seconds (˜96% reduction) by reducing redundant database calls.
- Authored PostgreSQL queries (inserts, updates, multi-table joins) to support case management workflows, ensuring data integrity across production records.

Projects

Farm Aid – Java, Spring Boot, Angular, MySQL Aug 2025

- Developed a full-stack agricultural loan management platform, reducing manual loan verification and review time by 40%.
- Designed Spring Boot REST APIs powering Admin and User modules – secure authentication, CRUD operations, feedback management – consumed by an Angular dashboard frontend.
- github.com/GarimaSingh2706/farmaid

Cavity Classification – Python, TensorFlow, Keras, OpenCV Aug 2024

- Trained a CNN-based image classifier analyzing 1,000+ dental images to detect and classify cavities.
- github.com/GarimaSingh2706/Cavity-Classification

Achievements

- Top 10 in a coding contest held at LTIMindTree (Feb 2026).
- Runner-Up, Kavach Cyber Security Hackathon (Aug 2023) – developed a malware detection system achieving 90% prediction accuracy.
- Solved 300+ Data Structures & Algorithms problems on LeetCode.
- Anchored the 4th and 5th International Conference on Advances in Materials, Mechanics, Mechatronics and Manufacturing (2025, 2026); organized 3+ technical sessions across colleges.

Education

Vellore Institute of Technology, Bhopal – B.Tech, Computer Science 2021 – 2025
CGPA: 8.75

Sanskar Public School, Gwalior – 12th (91.8%) | Oxford Public School, Gwalior – 10th (87.8%) 2019 – 2021

Certifications

- Docker – Hands-on DevOps – Udemy
- Model Context Protocol Mastery – Fractal (Coursera)
- Data Visualisation (Tata) – Forage
